

Trusting in brave ideas.

EUV Field Service Engineer TRUMPF Ireland

How brave are you? We are a high-tech company providing machine tools and laser technology and are looking for people who can face new challenges with a fresh mind. As an independent family company, we offer you the freedom and trust to put your brave ideas into practice.

Your Role

- Installation, commissioning, upgrade and retrofit of EUV Drive Laser Systems in Ireland/worldwide whilst working alone or as a team.
- Emergency field service, troubleshooting and repair of the Drive Laser Systems, including after-hours and weekend dispatch as required.
- Technical support via telephone and email assistance in repairing customer machines using remote diagnostics capabilities.
- Collaboration with world-wide TRUMPF departments to obtain answers to technical problems.
- Reporting discrepancies, unresolved or recurrent problems to EUV Service Management.
- Being a competent and reliable partner for our customers and our in-house service, you anticipate answers for upcoming questions in advance.

Your Profile

- Bachelor or master's degree in Electrical, Mechatronic or Mechanical Engineering or similar fields is preferred.
- Proactive and an organized self-starter who can work as an individual contributor and as part of cross functional team.
- Excellent communication skills and hands-on mentality.
- Must have strong electrical and computer systems background with strong diagnostic experience.
- Good mechanical proficiency with hand tools as well as precision measurement tools.
- MS Office applications experience required, i.e., Excel, Outlook, Power Point and Word; SAP & JIRA is a plus.
- Displays high accuracy and attention to detail. High quality work is paramount.
- Willingness to support other customers outside Ireland if required and flexibility with 'typical' work hours
- Travel of 50-100% required, must maintain valid driver's license.

With you on board, we would like to power ahead with the digital networking of the manufacturing industry. Our passion and creative drive ensure that we are an innovative force – across the globe at over 70 TRUMPF locations.

Your Benefits

- State-of-the-art work environment with the latest technology
- Early assumption of responsibility and varied tasks
- Broad range of training offers
- Respectful and appreciative corporate culture

Summary

TRUMPF is the world's leading supplier of drive lasers to Extreme Ultraviolet applications. As a TRUMPF Field Service Engineer; you will be installing, performing retrofits on, upgrading, and repairing the latest technology semiconductor chip manufacturing equipment for some of the global leaders in the industry.

We welcome all experience levels for this position and your tasks and training will be aligned based on your previous experience.
